

## ELECTRICAL SAFETY CODE REQUIREMENTS

- A. The Electrical Safety Code requires that all electrical equipment must be approved before it may lawfully be advertised, displayed, offered for sale, sold, or otherwise disposed of or used in Canada.
- B. It is, therefore, the responsibility of each exhibitor to ensure that all electrical equipment in, on, or about the booth space comply with these regulations. This includes electrical merchandise as well as lighting and display equipment.
- C. Electrical equipment for which approval is sought can be submitted to **CSA Group Testing & Certification Inc.** The approval of this Association is acceptable to all electrical inspection authorities in Canada.
- D. The Canadian Electrical Code and the Alberta General Safety Regulation requires all equipment to be approved by an accredited certification agency. Evidence of approval is to be in the form of marking authorized by the accredited approval agency. This identifying mark may be CSA (Canadian Standards Association), WH (Warnock Hersey), and cUL- Underwriters Laboratory Inc., (small c bottom left hand corner) to show that it has been approved to a Canadian Standard.
- E. One of the fundamental requirements for CSA certification is that the appropriate approval markings (C.S.A. monogram or label) appear on each device.

If such markings are missing, the device must be considered unapproved and, therefore, subject to special inspections.

- F. If you wish to display, offer for sale, or use any electrical equipment which is not now certified you may contact CSA Group Testing & Certification – Bev Engen or Jillian Curial at (780) 490-2006 for approval by means of their Special Inspections Service.
- G. Failure to comply to the Electrical Safety Code could result in the equipment being refused connection to the source of electrical supply, and may even be ordered removed from display.

**CSA Group Testing & Certification Inc.**

1707 - 94th Street  
Edmonton, AB T6N 1E6  
Tel: (780) 490-2030  
Fax: (780) 461-5322
